SUMMARY

Holding a BS and MS in Computer Science and a UI/UX Certificate, I combine technical expertise with design skills and an eye for detail to create user-friendly solutions. My portfolio highlights experience in UX research, quantitative research, user interviews, and crafting user journeys that enhance accessibility and satisfaction while adhering to brand standards. I've collaborated with cross-functional teams to redesign websites, develop mobile web and app solutions, and deliver functional prototypes. With a goal of delivering impactful, user-centric solutions, I am driven by innovation and design thinking to solve complex problems and shape meaningful experiences.

EDUCATION

Master Degree Computer Science

University of Denver

11/2023 - 11/2024 Denver, United States

- Cumulative GPA: 3.47/4.0
- Relevant Coursework: Human Computer Interaction, Web Development II

- Minor Graphic Design
- Cumulative GPA: 3.66/4.0
- Relevant Coursework: Software Design, Graphic Design I II III IV, Typography, Basic Design 2D

RELEVANT PROJECTS

Redesigning a website Case Study

- Conducted a meeting with the stakeholders to determine requirements and reveal user pain points.
- Worked closely with a team of designers to improve the website's structure, visual design, and navigation flow.
- Refined the website by incorporating feedback from stakeholders and usability testing insights to improve user satisfaction.

Mobile app Case Study

- Worked with other designers to build a tutoring mobile app, applied research design principles, and led the team through the UX research phase.
- Conducted qualitative interviews and used storytelling and flow diagrams to capture user expectations, complemented by surveys for quantitative insights to ensure satisfaction.
- Built a mobile app to provide students access to online tutors and give tutors an opportunity to transfer their knowledge through effective design solutions and mockups.

University of Denver HCI Projects

- Created a sustainability website to address climate issues using Figma.
- Presented a website to customers and received honorable mention from both customer and professor.
- Building a mobile app to give student access to online tutors.
