SUMMARY

With a BS and MS in Computer Science and a UI/UX Certificate, I combine technical expertise and design skills to create dynamic, user-friendly web solutions. My experience includes front-end development, UX research, and building responsive websites and prototypes. Passionate about innovation, I thrive in collaborative environments, delivering scalable and impactful user experiences.

EDUCATION

Master Degree Computer Science

University of Denver

- 11/2023 - 11/2024 Denver, United States
- Cumulative GPA: 3.51/4.0
- Relevant Coursework: Human Computer Interaction, Web Development II, Operating system, System Architecture

UI/UX Certificate

University of Denver UI/UX Bootcamp

- 06/2024 - 12/2024 Denver, United States

Bachelor Degree Computer Science

Rockford University

- 08/2018 - 12/2022 Rockford, United States
- Minor Graphic Design
- Cumulative GPA: 3.43/4.0
- Relevant Coursework: Software Design, Graphic Design I II III IV, Typography, Basic Design 2D

RELEVANT PROJECTS

Redesigning a website: Case Study

- Conducted meetings with stakeholders to determine user requirements and reveal user pain points.
- Closely collaborated with a team of designers to improve the website's structure, visual design, and navigation flow.
- Refined the website by incorporating feedback from stakeholders and usability testing insights to improve user satisfaction.

Educational Mobile App

- Works with other designers to create a tutoring mobile app, applies research design principles, and manages the team through the UX research phase.
- Conducts qualitative interviews and uses storytelling along with flow diagrams to capture user expectations.
- Conducts surveys for quantitative insights to ensure satisfaction.
- Built a mobile app to provide students access to online tutors and give tutors an opportunity to transfer their knowledge through effective design solutions and mockups.

Cuisine Mobile App

- Collaborated with a team of designers to develop an app that educates the user on a variety of cuisine choices. The app conducts surveys and interviews the user to identify their individual wants and needs. This information is necessary to effectively provide the user with product satisfaction.
- Used Figma to develop different prototypes and iterate on designs based on user feedback and testing insights.
- Presents design ideas to various design teams to encourage collaboration
